AWS IoT Node.js SDK

```javascript
var awsIot = require('aws-iot-device-sdk');
var device = awsIot.device({
    keyPath: "./certs/3fdf14d588-private.pem.key",
    certPath: "./certs/3fdf14d588-certificate.pem.crt",
    caPath: "./certs/root-CA.crt",
    clientId: "NodePublisher1",
    region: "us-east-1",
    host: "<your end point>.iot.us-
east-1.amazonaws.com"
});
```

AWS IoT Node.js SDK

```javascript
device
  .on('connect', function() {
    console.log('connect');
    device.subscribe('iotbutton/+')

    setInterval(function() {
      console.log('publishing...');
      device.publish('iotbutton/ABCD', JSON.stringify({ clickType:
"SINGLE", batteryVoltage: '999mV'}));
      console.log('done.');
    }, 2000)
    });
```
