AWS IoT Node.js SDK

```javascript
device
  .on('connect', function() {
    console.log('connect');
    device.subscribe('iotbutton/+')

    setInterval(function() {
      console.log('publishing...');
      device.publish('iotbutton/ABCD', JSON.stringify({ clickType: "SINGLE", batteryVoltage: '999mV'}));
      console.log('done.');
    }, 2000)
    });
```

AWS IoT Node.js SDK

```
device
  .on('message', function(topic, payload) {
    console.log('message', topic, payload);  });
device
  .on('close', function() {
    console.log('close');   });
device
  .on('reconnect', function() {
    console.log('reconnect');  });
device
  .on('offline', function() {
    console.log('offline');   });
device
  .on('error', function(error) {
    console.log('error', error);  });
```
