AWS IoT Button Example

- Register a Thing

- Note its ARN, and Endpoint

- Create and download Certificate

- Create a Policy, and attach to Cert

- Subscribe a Test listner

- Configure IoT Button and Test it.

- Create a Rule to send SMS on Click

AWS IoT HTTPS Example

```
curl --tlsv1.2 --cacert root-CA.crt --cert
certificate.pem.crt --key private.pem.key -X POST -
d "{ \"serialNumber\": \"ABC\", \"clickType\":
\"SINGLE\", \"batteryVoltage\": \"2000mV\" }" "https:/
<your end point>.iot.us-east-1.amazonaws.com:
8443/topics/iotbutton/ABC?qos=1"
```
